Parowan Progress.

Our fields are covered with about four inches of snow, which is encouraging to the farmer.

It appears that the interests of our friends at Cedar and ours are not identical in the matter of forest reserves. Well why not work together for such interests as are for the benefit of both. Good can be done in this way, and neither party suffer.

Matheson and we hope he will conduct himself in a becoming manner, and when "Our new set" demand the right to vote equally with the City Council we hope he will mind his business and not oppose it.

A committee of three were appointed to ask the county commissioners to restore the bounty on jack rabbits. It is considered that the bounty on coyotes is a little one sided, it benefits the sheepmen, but is of more injury than benefit to the farmer, inasmuch as it destroys one of the worst enemies of the jack rabbit and thus contributes to their increase.

The farmer's institute discussed the water question at their meeting on Monday night. Some of the laws of the state were read and commented on but they did not seem to suit us very well and the subject was tabled till next week.
